

About Me

A highly disciplined and resilient self-taught developer. Demonstrated a significant academic turnaround in final high school years, transitioning into a top-performing student. Combining technical certifications from Google and Cisco with a 500-day language learning streak to build social-impact projects. Committed to bridging the gap between community needs and technological solutions.

Personal Projects

Kindness Map (Kazakhstan & Turkey)

- Technology: HTML5, CSS3, JavaScript, Leaflet.js (Maps API).
- Key Features: Engineered a cross-border interactive map for Kazakhstan and Turkey with 4-language support (KZ, TR, EN, RU).
- Impact: Designed to connect volunteers with local charities, food banks, and aid locations in Astana and Ankara.

Dream AI Robot: "Talk with Kids" Concept

- Technology: JavaScript (Web Speech API), CSS Animations.
- Key Features: Developed a smart interface with voice synthesis that interacts with users in multiple languages.
- Purpose: Created as a "Talk with Kids" educational tool to engage children through storytelling and AI-driven conversation.
